

Frontalis™ Facial Composite System is a facial composite software yielding the same quality product as that offered by a police sketch artist. Frontalis™ is a cost-effective, portable and easy to use solution for catching more criminals. For a free product demo, e-mail: Frontalis@SketchCop.com.

FEATURES

Creates high quality, color or gray-scale images.

Database of approximately 2,000 facial components allows users to create countless facial composites.

Auto Display: Scroll through select facial feature sets to assist eyewitness if they have trouble recalling an individual feature.

Frontalis™ Editor tools: Brush, airbrush, smudge, clone stamp, dodge/burn, eraser, cut/paste, trapezoid distortion and many others.

Modification tools: Color adjust, positioning, scaling, margin adjustment, rotation (Together as a set, or individually), horizontal flip, etc. Parts can also be re-set to their default size.

Exportable facial composites as a JPEG, BMP, GIF or PNG can be opened in Adobe® Photoshop®, Adobe® Photo-shop® Elements, Corel Paintshop Pro or other popular graphic software programs for further editing.

Multi-View: Allows users to create 6 different versions of the suspect appearance for later reference by the victim.

Database: Available facial components will allow users to create a wide-range of ethnic faces. Agencies may also contract with SketchCop® Solutions to create custom ethnic facial features that may not be found in our standard database.

Facial Component Database includes: Heads, Chins, Ears, Foreheads, Cheeks, Hairstyles, Eyebrows, Eyes, Noses, Mouths, Headwear and Eye/Sun Glasses. Age your suspect using our Forehead lines, Eye lines Mid-facial lines and Neck lines. Alternative looks can be created using Beards, Stubble, Mustaches and Goatees, Masks-Earrings, Tattoos, Blemishes and Scars.

Discounts available for multiple licenses. Ask us for a quote.

Training: At our United States-based training facility in Las Vegas, NV
