SketchCop®

Online Facial Composite Software App

SketchCop® Facial Composite System is an online, subscription software app created for law enforcement agencies seeking a software-driven solution for creating facial composites. It can also be used by forensic science instructors in the classroom as a teaching tool.

SketchCop® Facial Composite System is portable, affordable and easy to use. Our software allows users to create stunningly accurate facial composites, even if they don't have artistic skills and without the help of a forensic artist.

Most important is that **SketchCop® Facial Composite System** helps law enforcement reduce investigative cycle times, saving them time and money.
